VEHICLE SCALE 14-15

-for operational reliability and better economics

A unique vehicle scale with an innovative design and exceptional operational reliability – essential for maintaining high profitability.

Flintab's 14–15 vehicle scale is a reliable solution designed for low operating costs. It is the result of extensive knowledge and experience in the design and manufacture of vehicle scales.

Throughout the development process, our focus has been on maximum accuracy, operational reliability, and a design that is easy to maintain.

When you purchase a vehicle scale from us, you gain greater security and control over your incoming and outgoing deliveries. In addition to the vehicle scale itself, we have also developed a range of accessories, providing a complete, high-quality solution.

Our offering includes intelligent weighing systems and robust vehicle scales, backed by a first-class service organization.

- No service access covers in the driving lane
- Fewer joints.
- The scale decks are made of prestressed concrete, and their convex design provides better drainage of water and dirt.
- Ample space and optimal conditions for effective drainage of water and dirt.
- Fewer load cells and smarter positioning reduce the risk of operational disruptions.
- The 14–15 model has fewer and larger foundations, increasing stability and reducing the risk of settlement.

VEHICLE SCALE 14-15 Variants

		STANDARD	PRO	HEAVY DUTY
Dimensions	Weighbridge length	12 m	6 - 13 m *	5 - 6 m *
	Total length	12 m / 24 m	6 - 39 m	6 - 36 m
	Width	3 m	3 - 4 m *	2,5 - 6m *
Capacity	Load	≤ 90 t	≤ 120 t	≥ 120 t *
	Load class	≤ BK4	≥ BK4	≥ BK4
Scale installation	Above ground	○	○	○
	Pit-mounted / Slope installation	○	○	○
Heating in scale and foundation	Deck heating	○	○	○
	Mousture sensor	○	○	○
	Hydronic heating	○	○	○
Load cell	Type	Mobile	Fixed	Fixed
Foundation	Precast	○	○	-
	Cast in place	-	○	●

* Customizable to meet customer-specific requirements

We offer the 14–15 vehicle scale in several variants to meet different needs. From simple solutions to demanding applications, there is an option to match your operation. All variants are designed with a focus on operational reliability, flexibility, and a long service life.

- = Mandatory
- = Optional
- = Not available

STANDARD is designed for normal industrial use and offers all installation and heating options, providing great flexibility.

PRO is a robust scale for tough industrial use. It offers, like the Standard, all installation and heating options but with a more durable design and the possibility of custom sizing.

HEAVY DUTY is a model specially adapted for special vehicles, with increased capacity, option for custom sizing, and an extra robust design to handle the most demanding environments.

WE MAKE SCALING EASY.

OTHER OPTIONS

Smart Heating Control
Save thousands by reducing energy consumption.

Ramp Support
Simplifies ramp construction.

Safety Rails
Guides the driver.

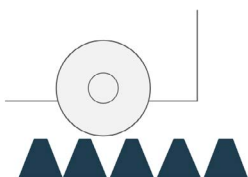

Flexible Reflective Bollard
Guides the driver.

Ramp Heating
Keeps the ramp ice-free and connects to the existing control system.

Side Skirt
Prevents debris from blowing underneath the scale deck.

Sand Grating
Shakes off sand and dirt before the tires roll onto the scale.
